

LETICIA RUTTIMANN

Product Manager/Owner

New Tecumseth, Ontario (Open to relocation) | leticiaruttimann@gmail.com
| +1(438) 275 3772 | linkedin.com/in/leticiaruttimann

PROFESSIONAL SUMMARY

Result-oriented Product Manager/Owner with over nine years of experience in the financial and insurance industries. Proven track record of bridging the gap between complex business requirements and technical execution, particularly in Wealth Management reporting and Insurance. Technical background as a software developer with current focus on Agentic AI and automation to drive operational efficiency. Fluent in English and Portuguese, with B1 French (currently advancing toward B2/Professional level).

CORE COMPETENCIES

- **Product Leadership:** Agile Delivery, Strategy & Road mapping, Feature Prioritization, Stakeholder Alignment.
- **Technical Excellence:** Generative AI & LLM Implementation (RAG, Agentic Workflows), Solution Design, SQL (DBever, MS SQL Server), API Integration (Postman, Swagger).
- **Tools & Frameworks:** Jira, Confluence, ServiceNow, Azure DevOps, Figma, Jenkins, Python (Basics), Prompt Engineering (Programmatic & Systematic).

PROFESSIONAL EXPERIENCE

DIGIT INC – Toronto, Canada

Product Owner *June 2025 – Present*

- Spearheading an early-stage Agentic AI project designed to automate the development lifecycle by parsing Jira tickets to automatically generate code, and pull requests to reduce manual workload by ~30%.
- Leading client-facing sessions with wealth management firms to gather reporting needs, clarify customization, and present technical solutions to decision-makers.
- Ensuring reporting outputs maintain strict data accuracy and lineage from source to delivery, supporting audit and compliance expectations.
- Defining complex technical reporting requirements as structured user stories and workflows for development teams.

SWISS RE CANADA – Toronto, Canada

IT Business Analyst *August 2022 – June 2025*

- Received recognition for implementing complex business logic and system migrations, ensuring high-quality user experiences and alignment with technical constraints, successfully avoiding regulatory fines in the US.
- Defined and validated API integration requirements and data flows between upstream and financial systems.
- Collaborated with global stakeholders and engineering teams to document and prioritize requirements, ensuring alignment on product vision and delivery timelines.

ZURICH INSURANCE COMPANY – Toronto, Canada

Senior Business Systems Analyst *March 2022 – August 2022*

- Led and continuously refined the product backlog on Jira, ensuring alignment with product strategy, business priorities, and delivery risks.
- Partnered with vendors to identify and implement platform solutions, enhancing claims management efficiency.
- Facilitated UAT sessions and delivered comprehensive end-user training for system implementations.

Career Transition – Toronto, Canada 2020-2022

- Relocated to Canada and focused on local market integration, translating previous international experience in the financial sector to the North American business landscape.
- Completed a postgraduate program in Software Engineering at the University of Campinas, deepening expertise in systems design and modern development methodologies.
- Dedicated time to mastering product management frameworks and technical tools relevant to the Canadian Tech industry, preparing for senior-level roles in Product and Technology.

SWISS RE CORPORATE SOLUTIONS BRAZIL – Sao Paulo, Brazil Product Owner | IT Team Lead *July 2015 – August 2020*

- Spearheaded the integration of Agro products into a new policy administration system, resulting in a 26% increase in premium bookings within one year.
- Conducted user prototype testing and gathered insights to refine products and improve customer satisfaction.
- Led a global team in decommissioning complex legacy systems and migrating to modern cloud-based platforms that increased net premium by 20% within one year, managing timelines, scope, and trade-offs.
- Gained cross-functional exposure to all major Lines of Business, including Marine & Hull, Agro, Surety & Credit, Casualty & Property and the Broker Portal by partnering closely with underwriters, operations, and compliance teams to streamline workflows and enhance system capabilities.
- Championed UI/UX enhancements that drove a 60% increase in net premium for the Marine LOB within a year.

ITAU AUTO E RESIDENCIA – Sao Paulo, Brazil System Analyst/Developer *January 2014 – July 2015*

- Implemented digital solutions for Auto and Home insurance using Java and SQL, focusing on improving backend stability and data retrieval.
- Conceptualized and presented a claims-tracking web application MVP during my Trainee program; the project's success led to direct recognition from C-level executives and my early promotion to a permanent role.
- Partnered with call center teams to identify recurring system failures, implementing technical fixes that reduced application downtime and improved agent efficiency.

EDUCATION

Certificate in Product Management – York University School of Continuing Studies, Ontario, Canada (2024)

- Developed **Grubster**, a product connecting users to local restaurants. Used Figma to design the product concept and created a demo video to showcase its features: [Vimeo Link](#).

Post-Graduation in Software Engineering – Universidade de Campinas, Brazil (2021)

Bachelor's Degree in Systems Development and Analysis – Faculdade de Tecnologia da Zona Leste, Brazil (2014)
